

PRISMVIEW™

PrismGroup™ | Field Chooser™ | Prism Filter™ | Prism Summaries™ | PrismEdit™

A comprehensive ERP solution, Centerprism™ a PATENTED Business Intelligence (BI) tool called PrismView™ - a SPREADSHEET view of your DATABASE. Centerprism uses Microsoft SQL Server as the database behind the application and PrismView can virtually provide ANY view thereby making Excel exports obsolete.

PrismView™ is a high performance, scalable data grid tool which allows the user to rapidly display and edit flat, tabular information. Its rich features allow users to sort, move, filter, and template data. PrismView™ requires no configuration nor additional databases. It directly connects to the database. PrismView™ offers superior multi-hierarchical grouping, field-column editing, and summary calculations so financial analysis is taken to a new level.

In Centerprism's ERP, PrismView™ is integrated into data inquiries, searches, and lists of virtually every card or transactional file in nearly all modules. As opposed to Excel, all searches and inquiries in PrismView™ are real-time as they are directly connected to your database. PrismView™ will support simultaneous multi-database views and can operate across a multi-server environment.

PrismView™ offers significantly more advanced navigation control and customization tools not available in other programs. PrismView™ also offers easy data calculation and import tool functions that would otherwise be difficult or time-consuming using Excel Pivot Tables. PrismGroup™, Field Chooser™, Prism Filter™, Prism Summaries™, and PrismEdit™ are the main features that comprise PrismView™.

Centerprism™ is an all-in-one ERP application offering Order Entry, Sales, CRM, Inventory, Pricing, Manufacturing, Purchasing, Wireless Warehouse Management, Retail Point-of-Sales, Field service and Financial modules along with integrated E-Commerce

PrismGroup™

PrismGroup™ offers drag/drop multi-hierarchical grouping on any column in any data view for all modules. Data in groups can be instantly expanded or contracted into a 'tree-like' view with a simple click. Display multiple parent-child and self-referencing relationships. Users can add, sort, and filter rows using their mouse or keyboard.

- **Unlimited Grouping** – instant multi-hierarchical relationships.
- **One-Click** expand/contract parent-child relationships and simultaneously add, sort, or filter data.
- **Field Chooser™** - Instantly add/remove columns.
- **Side-By-Side Comparisons.**

Field Chooser™

Field Chooser™ provides instant drag/drop functionality to add or remove data columns in any PrismView™ grid. Field Chooser directly accesses virtually any field from any SQL table so grid views can be customized for each user.

- **Combine multiple data tables** from different modules in the same grid.
- Customized PrismView™ grids can be **saved by the user.**
- Grids can be **pre-set** with columns in a specified order.
- **Add or remove columns with a swipe or 'click'.**

About Centerprism

Centerprism delivers a low cost, fully integrated software application dedicated to reducing Enterprise Resource Planning (ERP) complexities for the small to mid-sized businesses. This all-in-one product replaces multiple software solutions often cobbled together to accomplish the same business objectives.

Prism Filter™

Prism Filter™ extends the filtering capability of the PrismView™ grid with a variety of filtering options. The user can see a drop down of all values within a column and check or uncheck any single item or group of items for easier filtering. Custom filtering options with a popup dialogue box are also available.

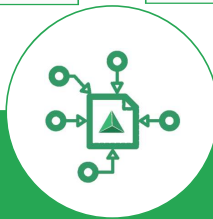

- **One click filtering on every column.**
- **A drop down List** allows users to instantly filter by any value in a column.
- A **popup dialogue box** enables complex mathematical calculations using customized filtering.
- Supports **simultaneous multi-database views** in a single grid; **parallel processing** is used to maximize performance.

Prism Summaries™

Prism Summaries™ offer the ability to calculate the sum of any or all numeric entries in a column with a simple click. Summaries can be pre-set to appear upon launching a PrismView™ grid. Multiple columns can be summed simultaneously. Columns with a summed value will automatically display the sub-values of that column for each group or sub-group. Multiple calculations can be displayed simultaneously for each column including: Sum, Average, Maximum, Minimum, or Count (the number of rows or entries in a column).

- Sum
- Average
- Maximum
- Minimum
- Count
- **Dynamic Drill Down™:** PrismView attributes are built into data drill down screens.

PrismEdit™

PrismEdit™ - provides the ability to perform mass editing of data in a PrismView™ grid for virtually any card file such as customers, items, vendors, and accounts, etc. The check/uncheck tool makes item selection fast and easy. The user can review the changes being made before saving to the database. The 'undo' button can fix human errors easily.

- Easy check/uncheck tool.
- Display changes before saving changes.
- Undo button.

Centerprism delivers a low cost, fully integrated software application dedicated to reducing complexities for small to mid-sized businesses. Centerprism also offers a Full Spectrum suite of modules in order to be your One-Stop solution for all your business needs.
