

Centerprism offers an integrated Equipment Rental solution with its Full Spectrum ERP that address all the key aspects of Rental Management including Rental Item Management, Workflow, Rental Order Entry, Reservations & Scheduling, and Rental Activity Status. Centerprism allows rental transactions to be integrated into same sales and financials system as is the Order Entry and Work Order Entry modules allowing combined customer billing. A separate Item file maintains rental items allowing the user to address the uniqueness of rental equipment. A mobility & E-Commerce solution is available that offers online selling and wireless rental warehouse management.

Rental Item Management

Centerprism houses rental items in a separate item catalog so not to commingle with stocked items. Multiple rental item catalogs can be created and rental items can be assigned to individual customers. A unique reservation schedule is maintained for each rental item that includes Hourly, Daily, Weekly, Monthly, and Overtime rates. A maintenance schedule is also provided.

- Multiple serial number tracking with availability status
- Auto calculate multiple billing rates from base rental rate
- Repair History automatically tracked
- Depreciation calculation

Workflow

Centerprism Rental Management offers a Rental workflow system that allows the user to configure the Rental Order & Billing process including the pickup and loading of equipment from the warehouse. Customers can be assigned rental contacts to allow for special arrangements such as periodic billing or cash terms.

- Dispatch Field Technicians
- Periodic Billing
- Auto Print Pick Tickets

Rental Order Entry

Centerprism offers a unique Rental Order Entry module that allows Rental Order Transactions to be differentiated for regular Order Entry or Work Order Transactions. A reservation system is built into this interface along with features unique to equipment rental such as the tracking of serial numbers, damage waivers, Periodic Billing, Pre-Billing, or environmental charges.

- Quoting
- Companion Sales
- Suggested Items
- Rental Types
- Attach Datasheets
- Serial Number Not available Alert
- One Click Rate Recalculation
- Easy Return & Exchanges

Reservations & Scheduling

Centerprism includes a Rental Reservation and Scheduling Dashboard that allows for the tracking of all rental equipment by customer by rental location. Reservations are tracked by rental status (Request, Hold, Open, Scheduled, Completed) that provides drill down into related rental activities.

- Alerts for Equipment Due to be returned
- Rentals Overdue List
- Integration to Outlook
- History of Rentals by customer by Serial Number
- Summation of total hours rented automatically tracked
- Service Repair alerts
- Waiting List

PrismView™ Activity Status

Centerprism offers a patented technology called PrismView™ that provides a spreadsheet interface to all rental transactions and activity stored in the application database. PrismView™ provides advanced navigation that includes Grouping, filtering, drill downs and the ability to generate calculations on the fly using existing data. Such technology is not available with other software vendors.

- Unlimited Grouping of any column
- Field Chooser™ - drop n' drop a field to a column
- Filtering by any field of value
- One-Click Calculation of any numeric field
- Side-by-side comparisons

As of September 2022, the equipment rental market has experienced consistent growth globally over the last ten years. Between 2010 and 2019, the market increased by almost 60 percent.
